INVENTORY OF VACANT INDUSTRIAL AND BUSINESS PARK LANDS, Mid-2022 to Mid-2024 UPDATE

Executive Summary

The Mid-2022 to Mid-2024 Vacant Industrial Land Survey (VILS) marks the second assessment and monitoring of vacant industrial land in the city of Ottawa based on the latest city of Ottawa Official Plan adopted by Ottawa City Council in November 2021. The reporting period for this report is mid-year to mid-year from July 1, 2022, to June 30, 2024, and provides a vacant industrial land supply update as of July 1, 2024.

This report monitors the city of Ottawa employment areas to ensure that their development aligns with policies set out in the *2024 Provincial Planning Statement* (PPS). Specifically, that policy 2.8.1 1a) through e) of the PPS is satisfied and that there is sufficient land in these areas for the long term or to 2046, the extent of the current planning horizon. Additionally, this report monitors vacant lands available for development in employment areas, the location of the development lands, infrastructure availability on the parcels and the type of development that is occurring.

As of mid-year 2024, there is a total of 1,121.9 net hectares (ha) of vacant land available for development in the employment areas with 450.3 net ha of Industrial & Logistics land, 400.2 net ha of Rural Industrial & Logistics land, 129 net ha of vacant land in the Mixed Industrial designation and 142.4 net ha on lands with either a village or other designation.

Nearly 90% of the vacant land in business parks is privately owned. Of the 121.5 net ha or 11 percent of publicly owned industrial land, 56.5 net ha are federally owned, 49.2 net ha are municipally owned and 15.8 net ha are provincially owned.

1.0 Introduction

The Vacant Industrial Lands Survey (VILS) reports on the inventory of vacant industrial and business park land in the urban and rural areas of the city of Ottawa. This report monitors the adequacy of supply and land consumption rates for employment lands. The report includes detailed mapping of all industrial and business park areas in both urban and rural parts of the city.

Since mid-2020, the majority of employment area land being developed is on Industrial & Logistics designated land with an average of 14.5 net ha consumed per year. Rural Industrial & Logistics land has been consumed at a rate of 1.1 net ha per year over the same time. If current development trends continue, the city of Ottawa has more than enough industrial land in business parks to surpass the 2046 planning horizon.

Over the past few years, development in business parks has been marked by fluctuation and variability. This has led to a consumption rate that has at times spiked in response to the development of a major industrial or industrial-type facility and then fallen as the number and size of industrial development has dropped. Despite inconsistencies in the rate of consumption of land in the business parks, there has been continued interest in developing these areas as the number of development applications in the business parks remains high. From 2022 to 2024, there were 13 applications for development on Industrial & Logistics and Rural Industrial & Logistics designated land. These applications are spread across the city with 85% in the urban business parks and 15% in the rural business parks.

This survey also identified business park parcels that are serviced and available to provide opportunities for larger scale industrial development to meet the growing demand for land for warehouses, fulfillment centres and extensive manufacturing. As of July 2024, there are over 300 gross ha of these larger development opportunity parcels on nineteen parcels in 7 business parks.

Official Plan - New Industrial Designations

The 2024 *Provincial Planning Statement* (PPS), defines “Employment Area” as: “...those areas designated in an official plan for clusters of business and economic activities including, manufacturing, research and development in connection with manufacturing, warehousing, goods movement, associated retail and offices, and ancillary facilities.” This definition has led the new Official Plan to introduce the concept of designating business parks according to their context and resulting in the development of three new designations applied to industrial land in the city. The three categories of industrial land designation drafted in the Official Plan and applied in this report are: Industrial & Logistics, Mixed Industrial, and Rural Industrial & Logistics.

Industrial and Logistics

According to the Official Plan, the Industrial & Logistics designation is applied mainly to lands where noxious uses that contribute to odour, light and noise etc.... are clustered to protect surrounding uses. This designation primarily contains more traditional industrial uses such as warehousing, distribution and construction.

Mixed Industrial

Their flexibility and diversity allow lands designated as mixed industrial to blend more easily into the surrounding area. Mixed industrial lands are generally lands that are a transition from traditional industrial to less noxious uses. Uses typically found in the mixed industrial designation include wholesale, light industrial and small-scale office uses.

Rural Industrial and Logistics

Rural Industrial and Logistics land located in the rural area of the city are also captured as part of the rural inventory for this report. These lands support uses that are noxious or not suitable in the urban area or the Rural Countryside.

For the purposes of this report, all industrial lands in business parks and industrial areas in the city of Ottawa will be reviewed. However, as Industrial & Logistics and Rural Industrial & Logistics designated lands have more industrial-based uses that need protection, only vacant industrial land contained in these two designations will be included in the vacant industrial land supply.

2.0 Methodology

City of Ottawa Official Documents and Industrial Lands

The impetus for the changes to industrial land assessment in the new Official Plan was derived from the *Industrial and Logistics Land Strategy for the new Official Plan*¹ report. The strategy in this document focusses on the industrial-related sector to ensure sufficient lands are designated and preserved for the needs of the local population and to help balance and diversify the local economy. The new Official Plan and the *Industrial and Logistics Land Strategy for the New Official Plan* report are the two main documents that form the basis for industrial land analysis in the Mid-2022 to Mid-2024 VILS report.

Methodology

This survey reports on the inventory of vacant industrial and business park land in the urban, suburban and rural areas of the city of Ottawa as of July 1, 2024.

Land covered by the survey in the urban and suburban areas are generally designated Industrial & Logistics or Mixed Industrial while land in the rural area is designated as Rural Industrial & Logistics. This report also includes some smaller parcels outside of these designated areas which are within Business Parks. All rural industrial areas have been identified either by their zoning, their designation in the new Official Plan, or within industrial land use in the secondary plans for the villages of Richmond, North Gower and Greely.

As in previous surveys, there are minor changes and updates to industrial area boundaries and the vacant properties inside them due to modifications to better define the extent of the areas. Other small changes have also occurred due to updated POLARIS property fabric. Additionally, revisions have been made in some areas because of increased refinement of the survey from year to year. As a result of these changes, detailed comparisons between this report and earlier surveys may not be possible for all areas.

Parcels identified in this report as vacant include lots (or part lots) that do not have permanent structures on them but may include lands that are temporarily used for outdoor storage. Vacant lots may not be available for development at the present time depending on servicing and landowner intentions.

In most instances, land parcels based on ownership form the basic unit of observation. Parcels may be further subdivided based on variations in zoning or other factors. For technical information on the parcel mapping, refer to Appendix I.

This edition is the latest in a series of similar monitoring reports prepared by the city and (prior to 2001) the former Region of Ottawa-Carleton since 1984.

¹ City of Ottawa, December 2020. *Industrial & Logistics Land Strategy for the New Official Plan*. Joint Planning Committee and Agricultural and Rural Affairs Committee, January 26, 2021.

3.0 Overall Vacant Land Supply

Table 1 of this report summarizes the total gross vacant land area of each industrial area and business park in the city of Ottawa. On July 1, 2024, the total gross industrial land supply in the city of Ottawa was 1,238.9 gross hectares down 22.5 gross hectares from July 2023. When lands reserved for rights-of-way, stormwater ponds and other non-industrial uses are excluded, 1,121.9 net hectares of vacant development land remains available for future development in the city. The distribution of these vacant available lands by major geographic area is illustrated on Map 1.

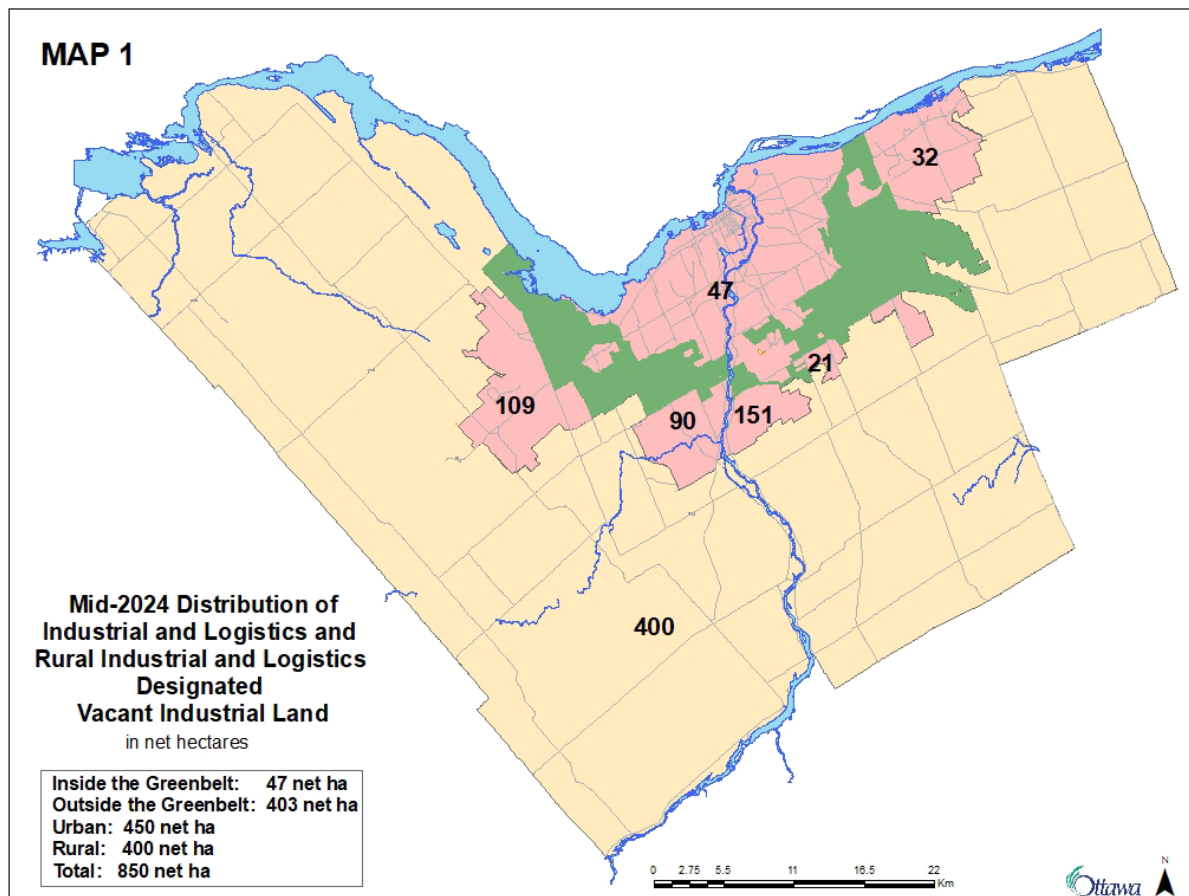

The total city-wide supply of 1,121.9 net hectares (ha) was a decrease of 16.1 net ha from mid-year 2023. There were 587 net ha in the urban area and 539 net ha in the rural area.

The total vacant industrial land supply by major geographic area between 1984 and mid-2024 is summarized in Figure 1. Vacant industrial land supply reached new lows in mid-2024. Overall, the city-wide supply of vacant industrial land was down by approximately 64.1 net ha from mid-year 2022. Changes to the total land supply were the product of lands that were developed, or existing industrial lands that were redesignated to another use through the comprehensive Official Plan process. Between mid-2022 and mid-2024, a total of 23.9 net ha was developed for industrial and other employment uses including development on underutilized lots.

4.0 Vacant Land Supply by Official Plan Designation

The supply of vacant designed land in business parks and industrial areas declined slightly (16.1 net ha), between Mid-2023 and Mid-2024. Much of this decrease can be attributed to the development of industrial lands. When summarized by designation, Industrial & Logistics and Rural Industrial & Logistics designated land comprise roughly 76% of the designated supply. The total supply of designated vacant land throughout the city of Ottawa can be summarized as follows: Industrial & Logistics: 40.1%, Rural Industrial & Logistics: 35.7%, Other designations: 12.7%, Mixed Industrial: 11.5%. The distribution of Industrial & Logistics and Rural Industrial & Logistics designated land by major geographic area is illustrated on Map 2. For a more thorough breakdown of the supply of designated land by area, please see Table 2 in Appendix II.

Industrial and Logistics Designated Land Supply

As of July 1, 2024, there was a total of 450.3 net ha of vacant industrial land in the city designated as Industrial & Logistics. Most of this land (76%), is in the western part of the city in the Riverside

South Business Park (151 net ha), the Carp Rd. & Highway 417 Industrial Area (61.3 net ha), the Borrisokane Industrial Area (47.4 net ha), the 416 Business Park (42.2 net ha) and the A.G. Reed Industrial Area (40.8 net ha).

Vacant Industrial & Logistics Land by Employment Area, July 1, 2024	
Employment Area	Vacant Land Supply (net ha)
Riverside South Business Park	151.0
Carp Rd. & Highway 417 Industrial Area	61.3
Borrisokane Industrial Area	47.4
416 Business Park	42.2
A.G. Reed Industrial Area	40.8
South Orleans Business Park	25.9
Hawthorne-Stevenage Industrial Area	24.4
Albion-Leitrim Industrial Area	21.0
South Walkley-Albion Industrial Area	8.5
Kanata West - N. Business Park	7.2
Cardinal Creek Business Park	6.5
Newmarket-Cyrville Industrial Area	6.0
Merivale Industrial Area	4.4
Sheffield Industrial Area	2.0
Ottawa South Business Park	1.6
Total	450.3

Of the five business parks located in the Kanata-Stittsville area, only the Kanata West – North Business Park had any vacant Industrial & Logistics designated land (7.2 net ha). With 25.9 net ha, the South Orleans Business Park had the largest amount of vacant Industrial & Logistics land in the east end of the city. Cardinal Creek Business Park was the only other business park in this end of the city with any vacant Industrial & Logistics land with 6.5 net ha. Only two of the more centrally located business parks had over 20 net ha of vacant Industrial & Logistics land; Hawthorne-Stevenage Industrial Area (24.4 net ha) and Albion-Leitrim Industrial area (21 net ha). (Table 2)

Mixed Industrial Designated Land Supply

There was a total of 129 net ha of vacant lands designated as Mixed Industrial in the city as of mid-year 2024. These lands were primarily concentrated in three business parks: South Merivale Business Park (49.5 net ha), 416 Business Park (23 net ha) and Kanata West – South Business Park (22.6 net ha). These business parks comprised almost 74% of the Mixed Industrial designated land in the city.

Vacant Mixed Industrial Land by Employment Area, July 1, 2024	
Employment Area	Vacant Land Supply (net ha)
South Merivale Business Park	49.5
416 Business Park	23.0
Kanata West - S. Business Park	22.6
Terry Fox Business Park	6.2
Taylor Creek Business Park	5.8
Colonnade Business Park	5.7
Rideau Heights Business Park	4.5
Kanata West - N. Business Park	4.1
Ottawa South Business Park	2.0
Canotek Business Park	1.8
Kanata South Business Park	1.7
Albion-Leitrim Industrial Area	1.1
Stittsville Business Park	0.7
Merivale Industrial Area	0.3
Total	129.0

Five business parks contained at least 4 net ha of Mixed Industrial designated land. In the west of the city these were in the Terry Fox Business Park (6.2 net ha) and Kanata West – North Business Park (4.1 net ha). Inside the Greenbelt, there was 5.7 net ha in the Colonnade Business Park and 4.5 net ha in the Rideau Heights Business Park. Taylor Creek Business Park had 5.8 net ha of Mixed Industrial designated land in the east end of the city. There were a few remaining business parks that contained less than 2 net ha of vacant Mixed Industrial designated land scattered throughout the city.

Rural Industrial and Logistics Land Supply

At mid-year 2024, the city of Ottawa had 400.2 net ha of vacant Rural Industrial & Logistics designated land. Almost 70% of this land (279.7 net ha), was in the Carp Rd. Rural Employment Area. The remaining Rural Industrial & Logistics land was in three rural business parks: Moodie Drive Industrial area (44.3 net ha), Indcum Industrial Area (43.5 net ha) and South Gloucester Industrial Area (32.7 net ha).

Vacant Rural Industrial & Logistics Land by Employment Area, July 1, 2024	
Employment Area	Vacant Land Supply (net ha)
Carp Rd. Rural Employment Area	279.7
Moodie Drive Industrial Area	44.3
IndCum Industrial Area	43.5
South Gloucester Industrial Area	32.7
Total	400.2

5.0 Overall Land Consumption

Over the past five years, development of industrial land in the city of Ottawa has been marked by inconsistency. Consumption within business parks has fluctuated as some years experienced spikes of development promoted by the construction of warehouse fulfillment centres and larger industrial facilities while in other years, development has consisted of smaller, less significant projects. In 2018 and 2021, the development of Amazon warehouse facilities drove up the consumption of industrial lands by accounting for well over three-quarters of the industrial lands consumed in these respective years.

Between mid-2022 and mid-2024, 23.9 net ha of land was developed in business parks and industrial areas in the city of Ottawa with 5.7 net ha developed from mid-2022 to mid-2023 and 18.2 net ha developed between mid-2023 and mid-2024.

With 10.6 net ha of land developed, the Kanata West – North Business Park saw the greatest amount of development during the mid-2022 to mid-2024 period. This was followed by 4.0 net ha developed in the 416 Business Park and 3.8 net ha developed in Terry Fox Business Park. In the rural area, a total of 4.6 net ha was developed with 1.8 net ha developed between mid-2023 and mid-2024 and 2.8 net ha developed between mid-2022 and mid-2023. Most of the rural development took place in South Gloucester Industrial Area (2.8 net ha) and Carp Rd. Rural Employment Area and IndCum Industrial Area with 0.7 net ha developed respectively.

Industrial Land Consumed by Employment Area, Mid-2022 to Mid-2024	
Employment Area	Consumed (net ha)
Kanata West - N. Business Park	10.6
416 Business Park	4.0
Terry Fox Business Park	3.8
South Gloucester Industrial Area	2.8
IndCum Industrial Area	0.7
Carp Rd. Rural Employment Area	0.7
Gordon McKeown Industrial Area	0.4
Ottawa South Business	0.4
Albion-Leitrim Industrial Area	0.4
Total	23.9

6.0 Land Consumption by Official Plan Designation

During the mid-2022 to mid-2024 period, most development took place on lands designated as Mixed Industrial development with 77.1% of the total development occurring on this type of land. This was followed by 17.8% development on lands designated as Rural Industrial & Logistics, 3.4% on Industrial & Logistics designated land and the remaining development (1.7%), taking place on lands with a village or non-industrial designation.

Industrial and Logistics Designated Land Consumption

Between mid-2023 and mid-2024, the Albion-Leitrim Business Park was the sole business park that experienced development on Industrial & Logistics designated land with an industrial building being constructed on 0.4 net ha of land in this area in late 2023. (Table 2) A total of 0.8 net ha of Industrial & Logistics land has developed since mid-2022 as 0.4 net ha was consumed between mid-2022 and mid-2023 for the development of a restaurant in the Ottawa South Business Park.

Mixed Industrial Designated Land Consumption

Mixed Industrial designated land experienced the greatest amount of development between mid-2023 and mid-2024. All the development on Mixed Industrial Land took place in three business parks in the western part of the city. Kanata West - North Business Park saw the development of two Mixed Industrial parcels. Both parcels were developed for an industrial warehouse. One 7.4 net ha parcel for Autoshack and the other a 3.2 net ha parcel for Purolator. A 3.8 net ha Mixed Industrial parcel of land was developed in the Terry Fox Business Park for U-Haul storage. The 416 Business Park in South Nepean developed a portion of a Mixed Industrial parcel for a long-term care home on 1.6 net ha of land. (Table 2) Between mid-2022 and mid-2023, only the 416 Business Park experienced development on Mixed Industrial land with 1.0 net ha developed for a hotel and 1.4 net ha developed for a car dealership.

Rural Industrial and Logistics Land Consumption

The Carp Rd. Rural Employment Area and the IndCum Industrial Area were the two business parks that experienced development on Rural Industrial & Logistics land between mid-2023 and mid-2024. In the Carp Rd. Rural Employment Area, a 0.7 net ha parcel was developed for an office warehouse while a restaurant was developed on two parcels of 0.5 net and 0.2 net ha in the IndCum Industrial Area. (Table 2) Two parcels of Rural Industrial & Logistics land were developed in the South Gloucester Industrial Area between mid-2022 and mid-2023. A 2.4 net ha parcel for a warehouse/office and a 0.4 net ha parcel for a self-storage building.

Except for a small portion of the of Carp Rd. Rural Employment Area being consumed for a section of a residential subdivision, no development took place on underutilized Industrial & Logistics or Rural Industrial & Logistics designated land parcels from mid-2022 to mid-2024. It should be noted that land developed on underutilized lands and roads are not counted as part of the vacant land supply or the consumption rate.²

7.0 Servicing of Designated Land

All vacant designated lands in the urban area are serviced³ by both water and sewer trunk services except the A.G. Reed Industrial Area, the Carp Rd. & Highway 417 Industrial Area and the Borrisokane Industrial Area. The A.G. Reed Industrial Area and the Carp Rd. & Highway 417 Industrial Area are partially serviced with central water while the Borrisokane Industrial Area remains unserviced except for a developed parcel that contains an assembly factory.

² Underutilized lots and existing road rights-of-way are identified separately in the report maps. Land areas for either use are not included in the reported land supply. Large lots are already netted down by a factor of 15% to take account of future roads and other non-industrial uses on these lots.

³ Serviced: lots with a service (water and/or wastewater) along the street frontage, subject to available capacity.

Of the 409 net ha of vacant suburban Industrial & Logistics designated land, 307 net ha were serviced with only the A.G. Reed industrial Area and Queensway West Industrial Area Industrial area lacking servicing (Table 2).

Development in the rural area is typically on private wells and septic systems. Moodie Drive Industrial Area and IndCum Industrial Area, however, contain lots that are partially serviced⁴ with central water services. The Richmond Industrial Area is currently serviced by private services but may be converted to communal water and central sanitary systems once they are available.

8.0 Consumption Rates on Designated Lands

Applying an average consumption rate is one method of estimating the future supply of industrial land in demand-years of land. Demand-years are determined by calculating average annual consumption over a specific period and dividing that into the available supply.

Overall Consumption Rates

The mid-2022 to mid-2024 development period saw an average annual development rate of 11.9 net ha of lands in employment areas. With an annual average of 9.2 net ha, Mixed Industrial designated land had the highest rate of development of lands in the business parks from mid-2022 to mid-2024. This was followed by Rural Industrial & Logistics (2.1 net ha), Industrial & Logistics (0.4 net ha) and Village and Other designated land (0.2 net ha).

Land Consumed for Industrial and Non-Industrial Development, Mid-2022 to Mid-2024				
Land Designation	2022-2023	2023-2024	Total (net ha)	Annual Average
Industrial & Logistics	0.4	0.4	0.8	0.4
Mixed Industrial	2.4	16.0	18.4	9.2
Rural Industrial & Logistics	2.8	1.4	4.2	2.1
Village & Other Designations	0.0	0.4	0.4	0.2
Total	5.7	18.2	23.9	11.9

The rate of consumption for land in employment areas consumed specifically for industrial uses between mid-2022 and mid-2024 was 9.3 net ha annually compared to only 2.6 net ha consumed annually for non-industrial uses. Geographically, the consumption rate in urban employment areas was 9.6 net ha annually between mid-2022 and mid-2024, higher than the 2.3 net ha annual consumption rate in the rural area over the same period.

⁴ Partial Service:

- a) Municipal sewage services or private communal sewage services combined with individual on-site water services; or
- b) Municipal water services or private communal water services combined with individual on-site sewage services.

Land Consumed for Industrial Development, Mid-2022 to Mid-2024b				
Industrial/Non-Industrial Development	2022-2023	2023-2024	Total (net ha)	Annual Average
Industrial	2.8	15.8	18.7	9.3
Non-Industrial	2.8	2.4	5.2	2.6
Total	5.7	18.2	23.9	11.9

Consumption Rates on Industrial & Logistics and Rural Industrial & Logistics Land

The overall rate of consumption of land in the Industrial & Logistics and Rural Industrial & Logistics designation was 2.5 net ha per year between mid-2022 and mid-2024. This rate was derived from annual rates of development of 1.9 net ha of industrial land developed on Industrial & Logistics and Rural Industrial & Logistics land and 0.6 net ha of non-industrial development taking place of the same type of land.

Land Consumed on Industrial & Logistics and Rural Industrial & Logistics Land, Mid-2022 to Mid-2024				
Land Use	2022-2023	2023-2024	Total (net ha)	Annual Average
Industrial	2.8	1.1	3.9	1.9
Non-Industrial	0.4	0.7	1.2	0.6
All Uses on I&L and RI&L Land	3.3	1.8	5.1	2.5

Running Average Consumption Rates

Running average consumption rate is calculated from cumulative land consumption of the current year and all preceding years beginning in 1985. Table 5a in Appendix II and Figures 3 and 4 show annual and running average consumption from 1985 onward. In general, the running average has been declining since 1985 although small peaks can be seen during periods of rapid growth.

*Averages in Figures 3 and 4 are running averages for the current year and all preceding years. Hence the average shown for 1997 is the average for the 1985-1997 period, the average for mid-2024 is for the 1985 to mid-2024 period etc.

From mid-2022 to mid-2024 period industrial land absorption experienced an increase in the urban area with no land consumed in mid-2022 to 14.8 net ha consumed by mid-2024. Overall, average absorption rates continued to fall and hit a new running average low of 32.5 net ha per

year for industrial uses only, and 37.5 net ha per year when all uses are included. Running averages in the rural area stood at 2.8 net ha in mid-2022 before dropping slightly to 1.6 net ha by mid-2024. (Table 5a)

For lands designated as Industrial & Logistics or Rural Industrial & Logistics, the urban area saw 0.4 net ha of land consumed between mid-2022 and mid-2024 to end at a 39-year low consumption rate for all uses of 36.9 net ha. The running average for development on Rural Industrial & Logistics land also hit new lows dropping from 10.6 net ha in mid-2022 to 10.4 net ha in mid-2024. (Table 5b)

For a more detailed review of industrial land consumption rates in the city of Ottawa since 1985, please consult Appendix II.

9.0 Active Development Applications in Business Parks

Although there can be considerable variability in year over year industrial development, there is still interest for industrial growth as noted by the number of recent applications received by the city for development on industrial lands. Between 2022 and 2024, the City of Ottawa received thirteen applications for development on Industrial & Logistics and Rural Industrial & Logistics designated lands. The 416 Business Park led all areas with 3 applications, followed by the Newmarket-Cyrville Industrial Area, Cardinal Creek Business Park and Riverside South Business Park with two development applications per area. For a more detailed view of the location of active, current development applications, please consult Appendix III.

10.0 Opportunities for Development in Business Parks

To meet the growing demand for larger parcels of industrial land for the warehouse and fulfillment sector as well as other large-scale manufacturing and industrial uses, serviced industrial parcels on Industrial & Logistics designated land were identified.

Highlighted lands were those that were 20 gross ha or more in size or what the city calls “mega sites” and sites between 11 and 19 gross ha and sites between 6 and 10 gross ha as these sites are valued for their capacity to develop mid-sized industrial uses and can employ on average between 100 and 300 employees. This survey noted several areas of opportunities for larger-scale industrial development on Industrial & Logistics designated land within 7 business parks totalling just over 300 gross ha with eight parcels of 6-10 gross ha of land, 5 parcels with 11-19 gross ha of land and 6 parcels that held 20 gross ha of land or more. Appendix III contains more detailed information on development opportunity areas in business parks in the city.

11.0 Conclusion

As of July 2024, there are 1,121.9 net hectares of vacant land available for development in city of Ottawa employment areas with 450.3 net hectares designated as Industrial & Logistics land, 400.2 net ha designated as Rural Industrial & Logistics land and 129 net ha designated as Mixed Industrial land.

Since mid-2020, most of the employment area being developed is on Industrial & Logistics designated land with an average of 14.5 net ha consumed per year. During the same period, there was an annual average of 1.1 net ha of Rural Industrial & Logistics designated land consumed per year. Based on current development rates, the city meets the requirements and satisfies the

intent of the policies set out in the 2024 PPS. Specifically, that policy 2.8.1 1a) through e) and that there is sufficient land in these areas for the long term or to 2046, the extent of the current planning horizon.

The mid-2024 VILS report has also noted the interest that exists in the development of the business parks through an analysis of active applications for development in these areas. As of July 2024, there are 13 applications for development on Industrial & Logistics designated lands. These applications are spread across the city with 77% in the urban business parks, and 23% in the rural business parks.

In accordance with 2024 PPS Policy 2.8.1 1b), strategic investment sites that provided opportunities for a diversified economic base... and which supported a wide range of economic activities were also identified in the mid-2024 VILS report. More specifically, sites that addressed the growing demand for land for larger-scale warehouses, fulfillment centres and extensive manufacturing on Industrial & Logistics and Rural Industrial & Logistics designated land were identified. As of July 2024, there are over 300 gross ha of these larger development opportunity parcels on nineteen parcels in 7 business parks.

Appendix I

Maps and Land Parcels

The location and size of individual parcels are mapped in ArcGIS from the POLARIS parcel fabric database. This provides a high degree of accuracy and is more precise than techniques available for surveys prior to 2004-05. The parcel fabric is updated regularly, and a single lot depicted in older surveys may not be identical to what is shown in this report even though the lot may look similar.

In most cases, the entire property is removed from the vacant land inventory when the land is developed. Because of the nature of industrial construction, a parcel is considered as developed only when above grade permanent structures are built or being built at the time when fieldwork is done. In cases where the land is primarily intended for outside storage a lot will be considered developed when it is being used for its intended long-term purpose.

There are some instances when only a portion of a property parcel is developed. If the remaining part of the parcel is judged to be of a significant size the remaining portion is placed in the "underutilized" category. These lots are depicted on the detailed maps but are not counted as part of the overall vacant industrial land supply unless at some point the area is severed and a new lot is created. Any development taking place on underutilized lots is not counted as part of the land consumption rate.

Land areas of individual parcels shown in this inventory may be expressed as net or gross hectares. Calculations of overall supply in this report are based on net (ha). Generally, lots greater than five but less than ten ha are categorized as either gross or net based on factors such as lot configuration and shape, whether it fronts on an existing road that can provide direct access, sizes of neighbouring lots in the area. These lots and those that are ten or more ha in area are converted to net hectares using a standard netting down of 15% to allow for roads and other non-developable uses such as Right of Ways (ROW's), Stormwater Management (SWM) areas and hydro corridor areas etc.....

In the 2016-17 update, analysis was performed to determine whether the 15% figure applied to account for roads and other non-developable uses such as ROW's, SWM areas and hydro corridor areas etc.... was still appropriate or whether development patterns on Ottawa industrial land use had changed over time requiring an adjustment to the netting out figure. To re-assess the net removal figure, the area of roads and other non-developable uses such as ROW's, SWM areas and hydro corridor areas etc.... was calculated from a sample of the business parks. This sample was assessed through two methods: removal of the high and low outliers, the median of the areas and the weighted average of the areas. When the outliers (15.8%) were removed, and the median (14.2%) and the weighted average (16.3%) of this sample was examined, the data yielded an average of 15% of gross lands which were dedicated to roads and other non-developable uses for all business parks. Based on this information, 15% gross to net reduction was still valid.

In the accompanying map tables, numbers may not add due to rounding.

¹ Developed land is reported in net hectares and does not include lands developed for rights-of-way or other uses such as storm water ponds.

Net vacant land is derived by applying an 85% percent factor on lots greater than 5.0 ha and some smaller sized lots if they are adjacent to these large lots.

Underutilized lots are portions of parcels that remain undeveloped after a parcel is developed. These pieces of land are tracked, but not included in the vacant inventory.

Developed mid-2023 to mid-2024 refers to development that took place during the 12 months from July 2023 to June 2024.

Shaded areas indicate the presence of partially serviced lots.

*2020 to mid-2024 data is for industrial development on lands that have been designated as Industrial & Logistics land in the new (2021) Official Plan.

Development for both industrial and non-industrial uses is included in Tables 4a and 4b. In Table 5a and 5b, annual consumption excludes non-industrial uses.

Table 5a. Land Development and Consumption Rates - 1985 to Mid-2024 (net ha)

8. 416 Business Park

The map displays the 416 Business Park area, bounded by Highway 416 to the west and Strachan Dr. to the east. The park is divided into several parcels, many of which are numbered. The land is color-coded and pattern-coded according to the legend:

- Vacant Land:** Solid green color.
- Un-opened ROW:** Solid red color.
- Industrial and Logistics:** Diagonal hatching (top-left to bottom-right).
- Mixed Industrial:** Cross-hatching.

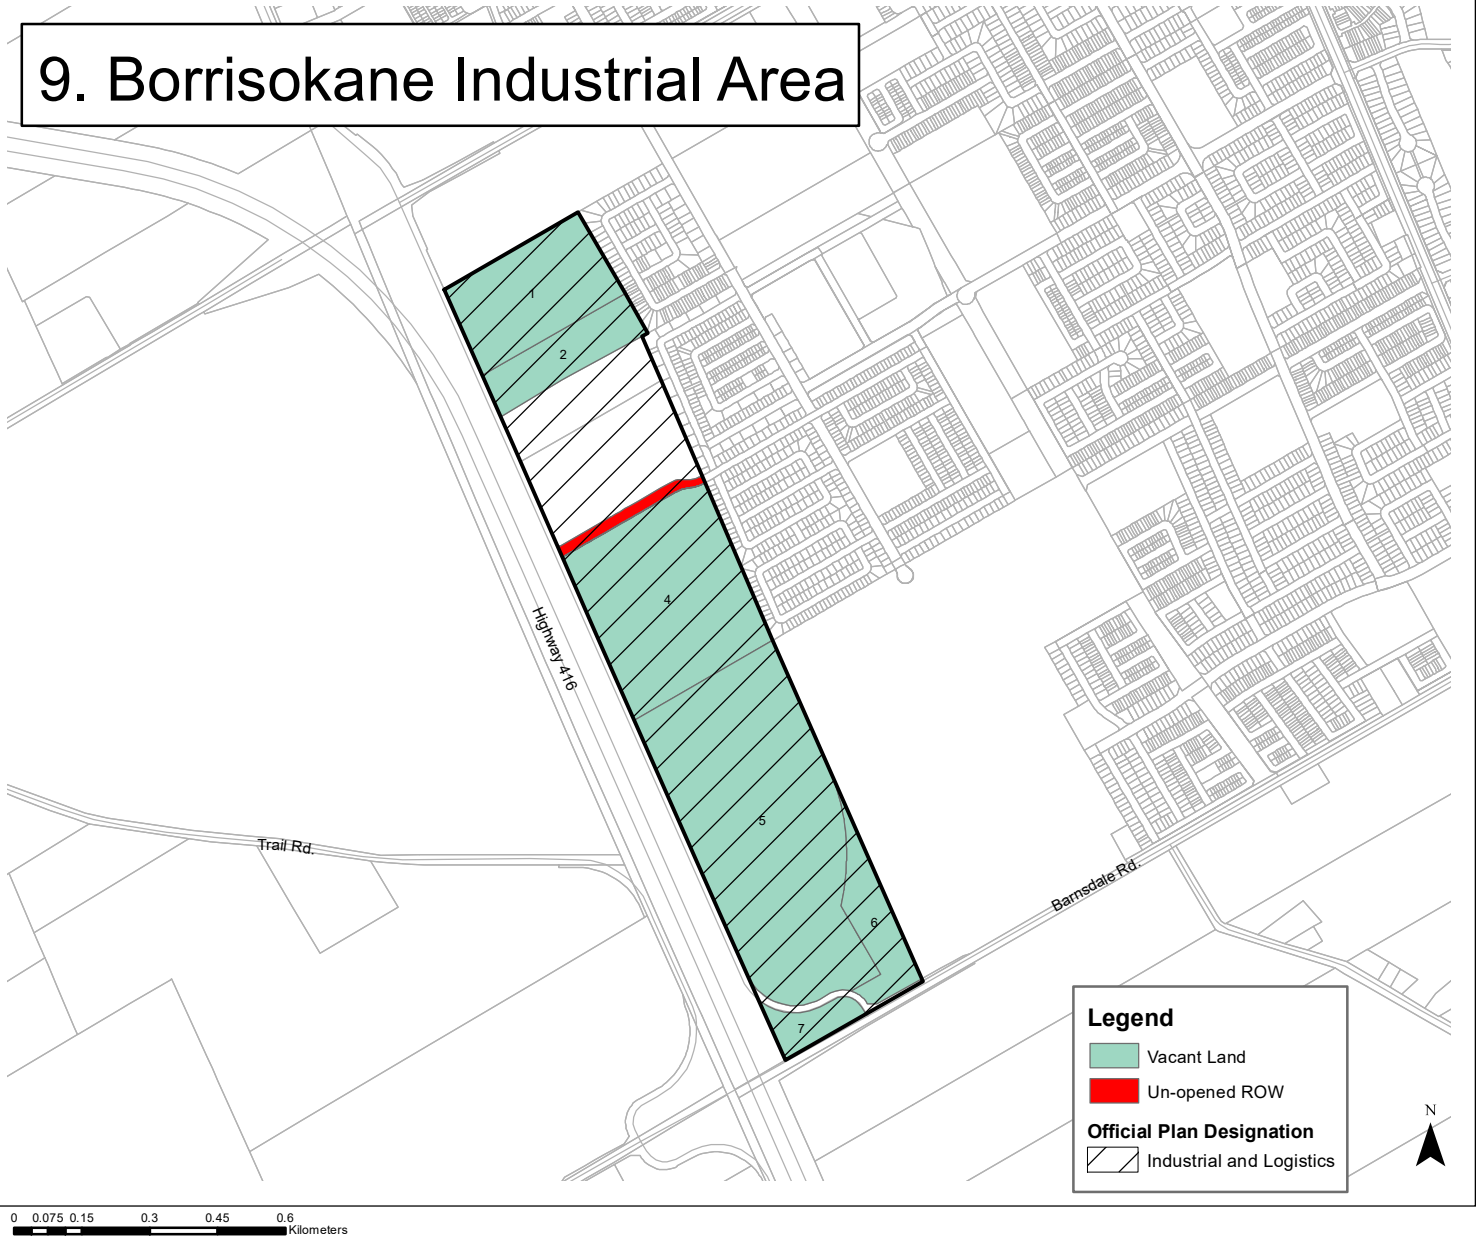

Parcel numbers visible on the map include 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, and 31. A north arrow is located in the bottom right corner of the map.

**I&L = Industrial & Logistics

The map displays a large industrial and logistics area in the Lethbridge area, bounded by Lethim Rd. to the west and Albion Rd. to the north. The area is divided into several numbered sections (1-10) and is color-coded to indicate land status and official plan designations.

Legend:

- Vacant Land:** Light green fill.
- Un-opened ROW:** Red fill.
- Official Plan Designation:**
 - Industrial and Logistics:** Diagonal hatching (top-left to bottom-right).
 - Mixed Industrial:** Cross-hatching.

The map shows a large area of vacant land (light green) and un-opened ROW (red) within the industrial and logistics area. The area is also divided into sections 1 through 10, with sections 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10. The map also shows the surrounding residential areas and the road network.

19. Hawthorne-Stevenage Industrial Area

This map illustrates the Hawthorne-Stevenage Industrial Area, highlighting various land parcels and their designations. The area is bounded by a thick black line. Key roads shown include Walkley Rd., Conroy Rd., Swansea Cres., Hawthorne Rd., Highway 417, Russell Rd., and Hunt Club Rd. The map features several green-shaded parcels, some of which are numbered (e.g., 1, 4, 5, 6e, 7, 8, 9, 10, 13, 15, 17, 18, 19, 20, 21). A legend in the bottom right corner defines the symbols: a green square for 'Vacant Land', a red square for 'Un-opened ROW', and a hatched square for 'Official Plan Designation Industrial and Logistics'. A north arrow is located in the bottom right corner.

20. Sheffield Industrial Area
21. Newmarket-Cyrville Industrial Area

The map displays the Sheffield and Newmarket-Cyrville Industrial Areas. Key roads shown include Cyrville Rd, Old Innes Rd, St. Laurent Blvd, Russell Rd, and Highway 417. The map is divided into two main sections: Newmarket-Cyrville (top) and Sheffield (bottom). Vacant land is highlighted in green, and un-opened Right-of-Way (ROW) is highlighted in red. The map also shows the official plan designations for the areas: Industrial and Logistics (diagonal lines) and Mixed Industrial (cross-hatch pattern). A legend in the bottom left corner defines these symbols. A north arrow is located in the bottom right corner.
