

## **Urban Exceptions (article 239)**

---

The provisions of this By-law have been amended with respect to lands to which the exceptions set out in Table 239 apply and which are shown on the zoning maps, the number of the exception in question being indicated between two square brackets " [x]" in the area code. The phrase "multiple" in Column II indicates that the exception applies in more than one location. (regulation 2009-302)

As stated in Section 19, where an exception applies, the provisions of the exception prevail over any other provision of these Rules.
