

Transportation Services Department - O-Train Construction

2017 Budget Briefing Note

Description

The Transportation Services Department brings together all services related to the mobility of the City, serving as a holistic transportation hub that focuses on the planning, implementation, operations and delivery of all modes of transportation. Every service and project delivered by the department impacts how people commute – whether by bus, train, car, bicycle, walking or a combination of these – both now and in years to come.

The role of the O-Train Construction Branch is to lead the O-Train Confederation Line light rail transit project. This project represents the implementation of the light rail elements of the City's Transportation Master Plan (TMP). The system will provide rapid and high quality transit service from Tunney's Pasture Station in the west to Blair Station in the east. The O-Train Construction Branch oversees the contract with Rideau Transit Group; the consortium selected to design-build-finance-maintain the Confederation Line project.

Programs/Services Offered

- Ensure technical compliance with Project Agreement requirements including review of contractor design submissions, construction activities, vehicle requirements, systems, testing and commissioning
- Manage project scope, cost and schedule
- Identify land and property requirements
