2021 Service Area Summary - Information Technology (IT) Service Area

Information Technology (IT) Services partners with the City's many different lines of business to provide innovative and cost-effective technology solutions to support delivery of municipal services to Ottawa residents. Client-focused and value-centric, IT Services works to proactively meet the needs of all client groups by helping them achieve their business priorities through technology, while taking into account all legal, cyber security, statutory and record-keeping obligations.

Programs/Services Offered

IT Services is responsible for the provision of technology services and systems to over 350 work locations across the City, more than 11,900 networked clients and 14,500 computers and mobile devices. IT Services also maintains hundreds of business-specific software and applications in support of the range of services and programs.

IT Services' core offerings include:

- Essential day-to-day technologies such as email and Office productivity suite; desktops and laptops; telephony; smartphones and tablets and printing, fax and scanning;
- Frontline support for technology devices, systems and applications through the City Tech Solutions Desk, City Tech Service Counters and City Tech online portal;
- Digital workplace technologies, including team collaboration and messaging platforms, videoconferencing and mobile productivity solutions, that allow employees to access critical resources anytime and anywhere;
- Advisory services such as business technology planning; enterprise architecture; business process mapping and engineering; industry trends & market research; and vendor & product assessment;
- Application services such as enterprise and business-specific system implementation, integration, support and maintenance; business intelligence tools; cloud solutions, mobile and web application development and support; and software application lifecycle management and rationalization;

- Development, configuration, customization, maintenance and support of the City's critical SAP infrastructure which underpins a variety of corporate functions, including recruitment and human resources management, work management and financial management;
- Technology security services geared to ensuring the security and integrity of the organization's technology environment; these services include awareness, incident management and response, security monitoring and risk and threat assessment and management;
- Infrastructure services such as network management; data storage and management; engineering; facility technology fit-ups; investigations and audit support; and telecommunication services.
