

The [Public Transit Infrastructure Fund](#) (PTIF) supports the rehabilitation of public transit systems (including O-Train Trillium Line); the planning of future system improvements and expansions; enhanced asset management; and system optimization and modernization.

The City of Ottawa was approved for \$155,700,000 through investments from both the Government of Canada and the Government of Ontario.

Funding will allow for improvements to transit infrastructure across our City; from new covered bicycle shelters across our rapid transit network, to the acquisition of 17 new high-capacity buses that will allow for better transit service to the fast growing areas of the City.

Bus stops will be improved at various rural locations to enhance waiting conditions and improve cycling connectivity and safety throughout the rural community. Collaboration with Provincial and Federal governments has achieved significant progress for Ottawa residents. Our economy, environment, and every corner of Ottawa will benefit from the PTIF.

The program closed in 2022.

Unique ID	Project Name	Funding Stream	Benefit Statement	Total Eligible Project Costs (from Funding approval letter and announcement)	Funding Recognition
OTT-001-PTIF	Mann Avenue Transit Structure Replacement - Design and Construction	Public Transit	Modern, reliable public transportation services	\$5,000,000	Government of Canada
OTT-002-PTIF	Transit operator crew room at Bayview station - Design and Construction	Public Transit	Modern, reliable public transportation services	\$1,500,000	Government of Canada
OTT-003-PTIF	Tunneys Pasture Bus Loop - Design and Construction	Public Transit	Modern, reliable public transportation services	\$3,000,000	Government of Canada
