

Are all of these wise uses of water?

Put an X over the pictures which show the waste of water.

Answers:

1. Turning off the water tap while brushing your teeth is a good way to save water.

2. Watering your lawn while it's raining is a waste of water.

3. Keeping a container with water in the refrigerator, instead of running the tap until the water gets cool, is a good way to use water wisely.

4. To save water, fill the sink with water to rinse when washing dishes by hand.

5. Letting your bathtub overflow is a waste of water; one quarter full should be enough.

### Your drinking water:

Before fresh, clean water comes out of your tap, it is treated and stored. Help the water find its way to your home. Draw a line from the Ottawa River to your tap.

### The trip to clean water:
