# COMMUNITY HOMELESSNESS REPORT SUMMARY

# City of Ottawa

#### 2022-2023

The Community Homelessness Report (CHR) is an annual Reaching Home reporting deliverable that supports communities to prevent and reduce homelessness using a more coordinated, systems-based and data-driven response. The CHR was designed to support local discussions and decision making, using all of the information about homelessness currently available at the community level. Communities are encouraged to use their CHR data to develop clear plans of action that help them to reach their homelessness reduction targets and to leverage the collective efforts of service providers working across the community, regardless of how they are funded.

This is a summary of the CHR for the 2022-23 reporting cycle. It shows the community's self-assessment of Reaching Home implementation, which includes the following key components:

• meaningful collaboration between Indigenous and non-Indigenous partners (see Section 1);

• community-level governance, coordinated service delivery (Coordinated Access) and use of a Homelessness Management Information System or HMIS (see Section 2); and,

• an outcomes-based approach (tracking community-level outcomes and progress against targets using a Unique

dentifier or By-Name List, referred to as a List; see Section 3).

If the community was able to report on outcomes and targets, this CHR Summary also includes results for each of the five core outcomes of Reaching Home (see Section 4).

Section 1. Community Context – Collaboration between Indigenous and Non-In	digenous	Partners
Does your community, as a Designated Community (DC), also receive Reaching Home Indigenous Homelessness (IH) funding?		DC and IH funding eams co-exist
Specific to Coordinated Access and the HMIS, has there been ongoing, meaningful collaboration the DC CE and the IH CE and/or IH CAB over the reporting period?	between	Yes
Describe this collaboration in more detail.		
Through the year, the City collaborated with the IH CAB on various aspects of Coordinated Acces Indigenous community is leading the conversation surrounding the use of data for their populatio supports to achieve those goals. This collaborative effort largely surrounds the proper usage of H Coordinated Access (ICA).	n, and the	City is providing the
The City's Coordinated Access Lead and the Indigenous Coordinated Access Lead meet regularly to discuss the best use of various HIFIS modules that support these joint data efforts, as well as other improvements to the use of HIFIS. Key supports provided by the City include the development and delivery of training regarding the use of HIFIS and ICA, and the development of processes and reports based on the recommendation and leadership of the ICA.		
The City and the IH CAB are currently in discussions regarding the ongoing the funding of the IC. planning for the future continues to take place, including upcoming projects such as expanding th "Waitlist" module to coordinate and prioritize referrals to services offered by Indigenous partners.	ne usage of	

Specific to Coordinated Access and the HMIS, has there been ongoing, meaningful collaboration between	
the DC or Territorial Homelessness (TH) CE and local Indigenous organizations over the reporting period?	

Yes

Describe this collaboration in more detail.

Yes, specific to Coordinated Access and our HMIS, there has been collaboration between the CE and the Indigenous agencies receiving homelessness funding. The ongoing collaboration includes the Indigenous agencies being part of the governance structure that oversees any considerations or updates related to Coordinated Access and the HMIS, including the Homelessness Community Advisory Board (CAB), Aboriginal Community Advisory Board (ACAB) and HIFIS Working Group.

In Ottawa, the Indigenous sector operates its own Indigenous Coordinated Access (CA) using HIFIS data provided by the City, and the two coordinated access systems have been running in parallel. They regularly share information to identify which clients are Indigenous either through HIFIS data in which people may have self-identified, or through 'in-reach' to shelters by Indigenous agencies. Identifying Indigenous clients enables the Indigenous system to offer culturally appropriate supports that will best assist Indigenous individuals to be successful in their housing. In developing the system, in 2018-19, our Indigenous partners established their own prioritization criteria for access to their Housing First Program. They also decided not to use the Service Prioritization Decision Assistance Tool (SPDAT) assessment tool with Indigenous clients because it was deemed to be culturally inappropriate and lacking a trauma-informed lens.

In 2022-2023, the City invited representation from Indigenous service providers on the newly-formed HIFIS Community of Practice. This community of practice is setup to guide data collection across the housing and homelessness sector. Since its inception, this group has met on two occasions.

This collaboration will also be strengthened in the future by updating HIFIS data sharing agreements with Indigenous agencies to align with OCAP principles, including sections acknowledging the rights of Indigenous peoples to control data about members of their community. To implement this work the City will work with Infrastructure Canada during the next update phase of the HIFIS data sharing agreements.

With respect to the completion of the Community Homelessness Report (CHR), was there ongoing, meaningful collaboration between local Indigenous and non-Indigenous organizations and, where applicable, the IH CE and/or IH CAB?	Yes
Describe this collaboration in more detail.	
Yes, in developing the CHR, the City consulted both the Homelessness Community Advisory Board (CAB) a Community Advisory Board (ACAB). There are three CAB members who represent Indigenous agencies who members, therefore they were consulted in both contexts.	•
The City consulted the Chair of the ACAB as to how the ACAB wanted to participate in the drafting of the CI requested that City staff attend their May 23rd, 2023 ACAB meeting to present the CHR draft to ACAB mem meeting in which the statistics were discussed, the City added the statement to Question 3.8 that the statistic people likely continue to be under-reported because many Indigenous people will not identify themselves as asked for their demographic information. After the ACAB meeting, the City sent the draft of the full report to written edits and additions. The City then sent the full report, for further feedback, to the ACAB and to the Cadvance of the CAB meeting on May 26, 2023.	nbers. After that ics on Indigenous s Indigenous when the ACAB, inviting
Does your community have a separate IH CAB?	Yes
Was the CHR also approved by the IH CAB?	Yes

Section 2. Coordinated Access and Homelessness Management Information System (HMIS) Self-Assessment

Summary Tables

The table below provides a summary of the work your community has done so far to meet the Reaching Home minimum requirements for Coordinated Access and an HMIS.

	Met	Started	Not Yet Started
Number of minimum requirements	18	0	0

The table below shows the percentage of minimum requirements completed for each core Coordinated Access component.

Governance	HMIS	Access Points to Service	Triage and Assessment	Coordinated Access Resource Inventory	Vacancy Matching and Referral
100%	100%	100%	100%	100%	100%

### **Summary Comment**

Are there particular efforts and/or issues that you would like to highlight for this reporting period related to your community's work to achieve the Reaching Home minimum requirements?

Although the City meets all Reaching Home minimum requirements, continued efforts have been made to enhance and improve Ottawa's Coordinated Access system, including the use of HIFIS.

For example, the City has implemented a Client Service Path working group. This group aims to collect information about client housing readiness in order to match them to service more effectively and has led to more client information being collected in HIFIS.

Additionally, several new community agencies were onboarded to HIFIS in 2022-23, with a focus on agencies that offer housing support, outreach services and general housing assistance. This expansion will help improve the Coordinated Access system by providing more data on the flow of clients through the service system, creating a deeper understanding of how they enter in to and experience homelessness.

# **Summary Tables - Minimum Requirement**

The tables below provide a summary of the work your community has done so far to transition to an outcomes-based approach under Reaching Home.

Step 1:	Step 2:	Step 3:
Has a List	Has a real-time List	Has a comprehensive List
Yes	Yes	Yes

Step 4: Can report <u>monthly</u> outcomes and set targets using data from the List (reporting in Section 4 is mandatory for 2023-24 CHRs, if not earlier)			
List was in place as of January 1, 2023 (or earlier)	Can generate monthly data	Has set targets	Has an outcomes-based approach in place
Yes	Outcome 1: Yes	Outcome 1: Yes

	Outcome 3: Yes	Outcome 3: Yes	Yes
	Outcome 4: Yes	Outcome 4: Yes	
	Outcome 5: Yes	Outcome 5: Yes	

# **Summary Comment**

Are there particular efforts and/or issues that you would like to highlight for this reporting period related to your community's work to transition to an outcomes-based approach under Reaching Home?

Improvements to the By Names List over the last year include:

• A new Client Service Pathway Report, which gathers client "document readiness" information across the emergency shelter system. This allows the City to prioritize document-ready clients and client who are willing to be housed for housing based case management services.

Over the next year:

• The City plans on improving the utilization of the housing placement and housing history module in HIFIS to gather inflow and outflow information throughout our system. The knowledge gained will support the City's efforts to identify gaps and make improvements to the BNL.

• The List continues to be used to match chronically homeless individuals to housing based case management services. These services support clients to secure and maintain housing. The BNL is also used to develop special projects to end chronic homelessness by identifying key demographics to target.

More information about the Unique Identifier List				
Step 1. Have a List	Step 1. Have a List			
Where does data for the List come from? HIFIS Excel I Other HMIS Other data source(s) Not applicable – Do not have a List yet				
Please describe how the List is created using HIFIS:	<b>D</b> : <i>W V</i>			
A custom report was created to pull all the homelessness stays, demographic information, Servi Decision Assistance Tool (SPDAT) Score of clients in HIFIS and then it is filtered in excel to dete and priority on the By-name List (BNL).				
In the future, will data from the community's HMIS (either HIFIS or an existing, equivalent system) be used to get data for the List?	Yes			

# Step 1. Have a List (cont.)

For the List, does the community have	
A written policy/protocol that describes how interaction with the homeless- serving system is documented	Yes
A written policy/protocol that describes how housing history is documented	Yes

# Chronic homelessness x Federal definition Local definition

# From the List, can the community get data for...

Newly identified on the List	Yes	
Activity and inactivity	Yes	
Housing history	Yes	

# From the List, can the community get demographic data for...

Age	Yes	Indigenous identity	Yes
Household type	Yes	Veteran status	Yes
Gender identity	Yes		

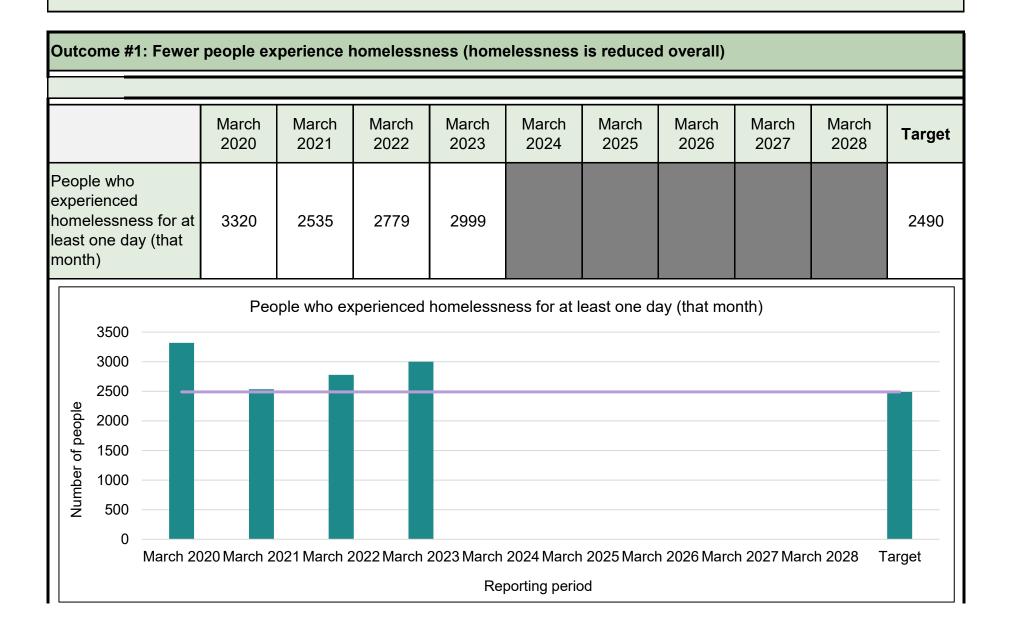

Step 2. Have a real-time List		
How often is information about people experiencing homelessness updated on the List?	As soon as new information is available	
Is people's interaction with the homeless-serving system (activity and inactivity) updated regularly on the List?	Yes	
Is housing history updated regularly on the List?	Yes	
Is there a process in place for keeping chronic homelessness status on the List up-to-date?	Yes	

Step 3. Have a comprehensive List	
Does the community have a document that identifies and describes all of the service providers that help people experiencing homelessness with their housing challenges?	Yes
<b>Optional question:</b> How does data from the List compare to other community-level data sourc or valid? This is an optional follow-up question for communities that have completed the " <i>Unde Data</i> " worksheet.	
*Optional: The City of Ottawa has developed community-level data reports that are of various channels. These reports and associated methodologies have been developed from sector partners and contain various datapoints from across the housing continut that are pulled using HIFIS data, the City compares the datapoints to other commun validate the data.	d over many years with feedback um. When reviewing new reports
While completing this review, the City noticed numerous inconsistencies between Cl and other comparable reporting measures used previously. When compared to othe trend differences, over/under reporting and a general lack of alignment with methodo Despite attempts to rectify and understand issues within the report's code we were u datapoints could be so different for similar metrics.	r data the CHR report had data blogies the City typically uses.
For this reason, the City has requested permission from Infrastructure Canada to us report metrics. Using City reporting methodology ensures that the data provided is a with similar metrics that have been report publicly	••••••••
