

2022 Housing and Homelessness Update

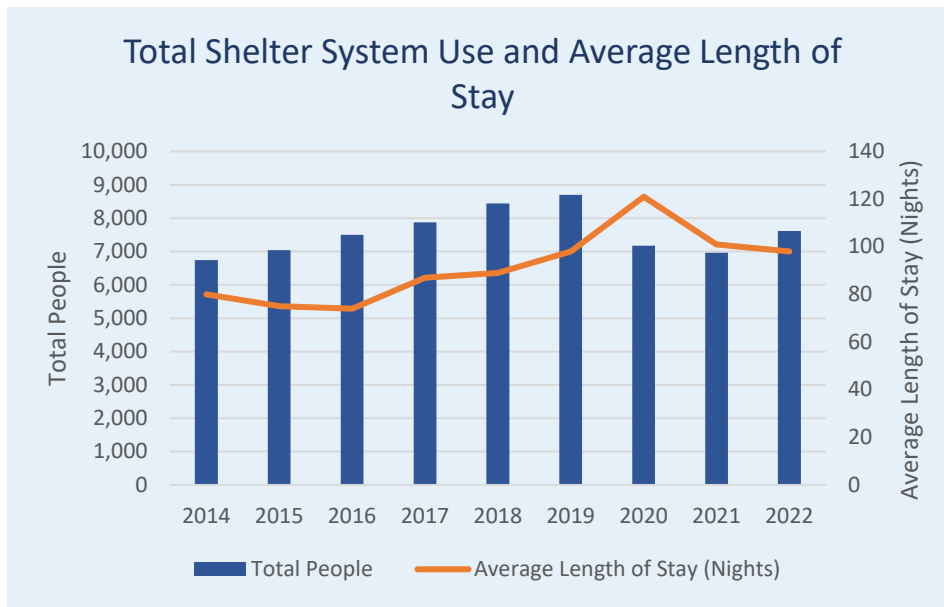

Homelessness Programs

- Additional \$700,000 over two years for a short-term housing-loss prevention benefit for recipients of social assistance
- A family homelessness prevention case conferencing table with a current 93% success rate (28 out of 30 cases have not entered shelter)
- 12 new Housing Based Case Managers added to support over 150 more clients
- 151 individuals were housed through Housing First services from January to September 2022
- 82% of singles in the Housing First program continued to retain their housing a year after becoming housed (March 2015 to September 2022)

Community Shelters

The following data is provided from the Homeless Individuals and Families Information System (HIFIS). HIFIS is a data collection and case management system used by the shelter system to collect information on people experiencing homelessness. The below may change as 2022 data continues to be vetted.

Change in Indicators between 2021 and 2022

	Single Adult Males	Single Adult Females	Single Youth 18 & Under	Family Units
Total Shelter System Users	+13%	+7%	+24%	+10%
Average Nightly Occupancy	+20%	+20%	+12%	+1*
Length of Stay	+1%	-2%	-1%	-7%
Chronic Homelessness	+15%	+23%	+4%	-3%

*Family members

Despite the above generally increasing trends, a few 2022 indicators remain lower than pre-pandemic levels (2019), including the total number of single adult male shelter users (-11%), the length of stay for single adult females (-2%), and the number of single youth 18 & under experiencing chronic homelessness (-24% or 8 people). All of the above indicators for families in 2022 remain lower than pre-pandemic levels, however it is expected that they will continue to increase as a result of social and political factors including migration.

Supportive Housing

Supportive housing units completed in 2022: **56**

Supportive housing units in progress in 2022: **180 units across 4 projects**

Community Housing

Total number of households on the CWL in 2022: **~11,064**

In 2022, 1,228 households were moved from the CWL into RGI housing and over 400 households were provided housing benefits, meaning a total of approximately 1,628 households were provided with affordable housing options.

2022 Inflow: ~3,870
2022 Outflow: ~1,228
of families housed: ~527
of singles housed: ~701
Number of new housing benefits provided in 2022: ~421

Total funding for rent supplement subsidies in 2022: **\$25,676,474**

Total funding provided for housing allowances in 2022: **\$6,078,919**

Affordable Housing

Affordable housing units completed in 2022: **8**

Affordable housing units in progress in 2022: **480 units across 7 projects**

2022 capital investment in affordable and supportive housing: **\$33M**
